

PRESS RELEASE

Delta and Ouray County, Colorado Clerk and Recorders to Implement Aptitude Solutions' OnCore Recording System and Automated Indexing Technology

Casselberry, Florida -- (October 12, 2005) -- Aptitude Solutions, a division of Fortune 500 company Fidelity National Financial, Inc. (NYSE:FNF) and leading provider of innovative technology solutions for county government, including OnCore county recording and workflow management systems, tax deed filing systems, document management systems and court case document management systems, today announced the signing of a three-year contract to provide Delta County and Ouray County, Colorado Clerk and Recorder's Offices with complete recording software and automated indexing technology.

Delta County and Ouray County bring the total to 26 Counties in the United States to implement Aptitude Solutions' OnCore recording platform, a system used by county government for electronic land records indexing and eRecording. In addition, both Delta and Ouray Counties represent the 1st Counties in the state of Colorado to select OnCore. Both Counties also plan to take advantage of OnCore's aiIndex technology, which will enable them to seamlessly scan documents and index the real estate deed information without manual intervention.

"This old fashioned, rustic Courthouse (built in 1888) will never be the same!" stated Ouray County Clerk and Recorder Michelle Ann Nauer. "Ouray County is excited to have this opportunity to install a technologically advanced, recording and eRecording system. The OnCore software will bring easy retrieval of 130 years of historical images, an opportunity to search/print online and eRecord; something Ouray County has never been able to offer to its customers. Thank you Aptitude Solutions and we look forward to our installation."

When Delta County started looking to upgrade their core recording system and get ready for eRecording, they focused on three main goals including 1) moving the Clerk and Recorder's operation into the future through upgrading their core recording system and implementing eRecording, 2) providing the very best service for their citizens as the customers of the Clerk and Recorder's office, and 3) creating the most economical value for the County in the purchase of new products and services.

Delta County Clerk and Recorder, Ann B. Eddins comments, "I feel that the process we went through to determine which vendor would enable us to meet these goals was very thorough. We are excited to sign the contract with Aptitude and feel that their product and service will accomplish our goals and take us forward into the future with eRecording. Their scan first technology will enable us to accept recordings in our branch office and provide better service to our citizens" she states. "Delta County is breaking new ground with this technology by being the first county in the State to provide immediate recordings in the branch office."

In addition, OnCore's online search will allow the public instantaneous access to their recorded documents through the system's dynamic interaction to the web. The recording software's web interface enables up-to-the-minute searching and image viewing from home or office.

Vice President, Tom McGrath explains, "Everyone at Aptitude is thrilled to be installing OnCore in our first two Counties in Colorado. Delta and Ouray Counties represent the first of many successes as we move forward in this region."
